

Pitch In to Protect Your Community

MEDDROP[™] Rx Med Collection

Communities throughout the United States are pitching in to protect children from inadvertent drug ingestion or drug abuse and to keep citizens safe from contaminated drinking water resulting from flushing, trashing or tossing of expired or unused prescription drugs.

Healthcare-related businesses and government agencies are joining the effort by providing convenient, secure collection receptacles expressly for the safe disposal of pharmaceutical-controlled substances as specified by the U.S. Drug Enforcement Administration (DEA).

The **MEDDROP** collection system provides a simple and effortless way for individuals to safely dispose of unused or expired medications. It is also an easy-to-manage program for DEA-registered collectors, such as for pharmacies and law enforcement agencies.

What Can Be Accepted?

YES

All expired, unused or unwanted controlled, non-controlled, and over the counter medications, including pet medications. Liquid products, such as cough syrup, must be tightly capped.

NO

Trash, Regulated Medical Waste, Sharps, Syringes, Thermometers, Hazardous Waste, Aerosols, Illicit Drugs or Commercial Waste.

How **MEDDROP** Works

The **MEDDROP** kiosk ships to your facility with two collection bundles, including liners and supplies to easily install and return collected contents via UPS.

The delivery of collection bundles can be scheduled to meet a customer's specific needs with shipping both ways always included. Additional bundles can be ordered with a phone call or email.

Installing and returning liners is easy:

- Form the box and tape bottom
- Insert liner in and around box
- Place inside collection unit
- Check the fill level at least weekly or as observed activity dictates
- When full, simply cinch and apply seal to the inner liner, complete and enclose shipping document, tape the box closed, affix the prepaid shipping label, and contact UPS for pick up.

All returned contents are witness-destroyed by incineration, ensuring that the pharmaceuticals are non-retrievable and environmentally harmless.

MEDDROP

MEDDROP Benefits

- Receptacles are easy to use and convenient for individuals seeking to safely dispose of medications.
- Container is eye-catching, yet secure and DEA-compliant.
- Both controlled and non-controlled pharmaceuticals can be collected.
- Destruction by incineration ensures drugs are completely irretrievable.
- Utmost program safety is achieved through serialized, opaque, tear-proof and tamper-evident liners which are 40 gallon capacity.
- All shipping materials are provided for ready pick-up and delivery using UPS

Kiosk Features

- Powder-coated steel collection receptacle
- One-way medicine drop with locking drop door
- Triple-locked front door access
- Securely fastens to a permanent structure
- Meets or exceeds the DEA requirements of 21 CFR 1300 et.seq.
- Collection receptacle size is 18"x20"x48"
- Made in the USA

About Assured Waste Solutions Get Started Today!

MEDDROP is a service of Assured Waste Solutions, headquartered in Gastonia, NC. Assured is a leading single-source provider of cost-effective solutions for the management, transportation and destruction of regulated medical waste and unwanted pharmaceuticals.

The company is DEA-registered to safely and securely handle Controlled Substances I-V. Its highly-trained staff receives, documents, stores and handles controlled substances for destruction every day at a secure facility.

MEDDROP is a convenient service for your customers, offering collection that is safe and meets the requirements of the DEA Controlled Substance Act. The system is easy to install and maintain, too.
